Dear Prof. Perel and colleagues at the Israel Society of Anesthesiologists

Sincere thanks from the Lifebox team for your generous donation to the project.

With your help we can provide pulse oximetry equipment to the hardest working, most under-resourced medical facilities in the world. Millions of patients are currently at unnecessary risk from unsafe anaesthesia, and each Lifebox oximeter we send is another step towards closing the dangerous global pulse oximetry gap.

Thanks to you we can also provide pulse oximetry and Surgical Safety Checklist training. This education and peer support is crucial for a permanent, positive change in the quality and safety of medical care around the world.

We'll keep you updated on Lifebox work, and the difference your donation is making.

With thanks again from all of us.

Best wishes,
